Area-The number of square units needed to cover a given surface.

Binomial-The sum of two monomials.

Coefficient- The number that is multiplied by the variable in an algebraic expression such as $5b$.

Customary Measurement System- A measurement system that measures length in inches, feet, yards, and miles; capacity in cups, pints, quarts, and gallons; weight in ounces, pounds, and tons; and temperature in degrees Fahrenheit.

Data- A set of information.

Estimate- An answer that is close to the exact answer and is found by rounding, by clustering, or by using compatible numbers.

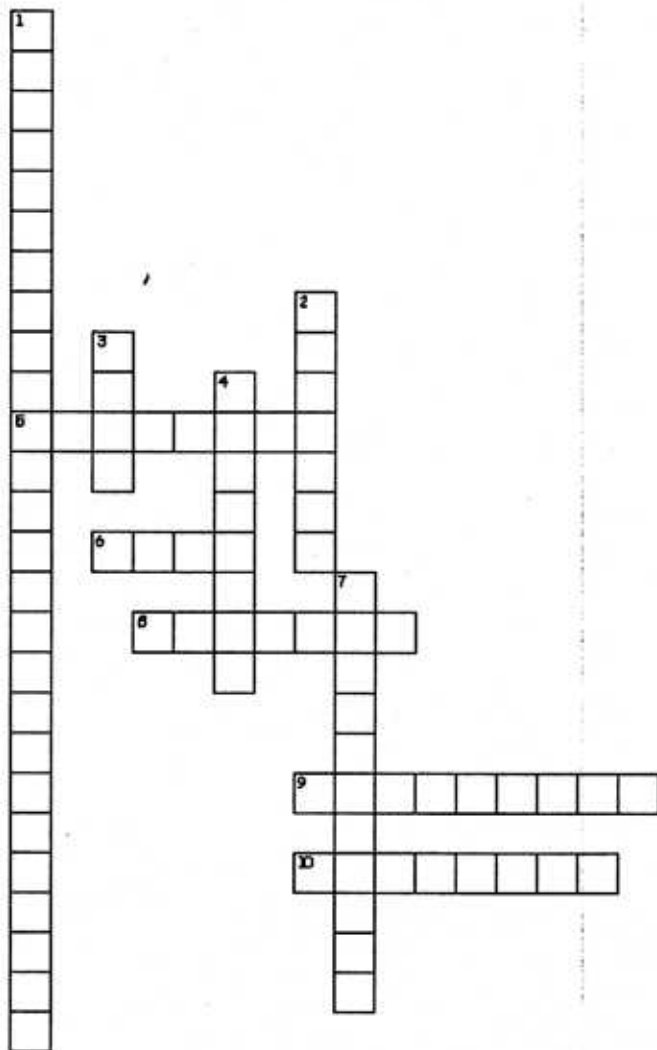

Histogram- A bar graph that shows the frequency of data within equal intervals.

Integer- The set of whole numbers and their opposites.

Polygon- A closed plane figure formed by three or more line segments.

Variable- A letter used to represent one or more numbers in an expression, equation, or inequality.

Criss Cross Puzzle

Across

5. An answer that is close to the exact answer and is found by rounding.
6. The number of square units needed to cover a given surface.
8. A closed plane figure formed by three or more line segments.
9. A bar graph that shows the frequency of data within equal intervals.
10. The sum of two monomials.

Down

1. A measurement system that measures length in inches, feet, yards, and miles.
2. The set of whole numbers and their opposites.
3. A set of information.
4. A letter used to represent one or more numbers.
7. The number that is multiplied by the variable in an algebraic expression.

10 of 10 words were placed into the puzzle.
